

UNDERSTANDING MEN'S TROUSERS: FIT

► **What is the ideal pair** of trousers for your body type
Find out and look your best!

Slim

- Designed to fit snugly but not quite as tight as skinny fit.
- Sits slightly below the waist
 - Slim through the seat and thigh
 - Straight leg opening

Ideal body type:
Thin/Ectomorph
Muscular/Mesomorph

Skinny

- Designed to be extra-slim and hug the legs. They end in a small leg opening.
- Sits below the waist
 - Extra slim through the seat and thigh
 - Narrow leg opening

Ideal body type:
Thin/Ectomorph
Muscular/Mesomorph
Heavy/Endomorph

Straight/Relaxed

- Relaxed fit pants and jeans are cut to provide extra room in the seat and thigh. They have the same leg width running down to the bottom.
- Sits slightly below the waist
 - Straight through the seat and thigh
 - Straight leg opening

Ideal body type:
Thin/Ectomorph
Muscular/Mesomorph
Heavy/Endomorph

Vaquero (Cowboy)

- Cowboy trousers fit snug at the waist and tights and the leg opening is large enough to fit over most boots but does not flare out toward the ankle.
- Sits slightly below the waist
 - Straight through the seat and thigh
 - Wide leg opening

Ideal body type:
Muscular/Mesomorph
Heavy/Endomorph
