

# PANTY STYLES

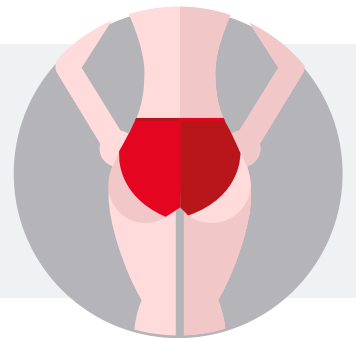

► **What is the best choice**  
to always look on point

## Hipster

A very comfortable style with minimal to moderate coverage. This low-rise panty makes your hips look bigger. Recommended to wear under loose outfits or think jeans.

## Brief

Briefs have a higher rise and provide excellent coverage. They are recommended for all body types but you should avoid wearing them under fitted clothes.

## Cheeky

Cheeky panties allow a bit of your cheeks to peek out. They are perfect to wear under fitted garments because the lines disappear under the clothes.

## Bikini

This is the ideal panty type for many body shapes. They feature narrow sides and a hip-level waistband that make them very flattering. Wear them under jeans or shorts.

## Boyshort

These panties provide a body-hugging fit. They provide extra coverage under skirts and dresses and they are great under pants.

## Thong

Thongs provide a line-free look that works great under form-fitting clothes.
